

Publications of the UK Ocean Acidification research programme (UKOA)

The publications listed below are direct or indirect outputs from the UK Ocean Acidification research programme, co-funded by NERC, Defra and DECC (now BEIS). Some of these resulted from work initiated before the start of the programme or supported through co-funding (e.g. from EC projects); for such publications, the criterion for inclusion is either a specific mention of UKOA in the acknowledgements or significant UKOA support for one of the authors.

Please note that:

- Most publications have been independently peer-reviewed and/or published in World-of-Science listed journals. Those not subject to such scrutiny, but nevertheless considered worthy of inclusion, are given an asterisk. Conference abstracts, posters and press releases are not included in the list.
- Information on print publication overrides that for online publication (e.g. Discussions version) of the same paper; however, the latter details are given where the former may be lacking.

2016 (to August)

Aksenov Y, Popova EE, Yool A, Nurser AG, Williams TD, Bertino L & Bergh J (2016) On the future navigability of Arctic sea routes: High-resolution projections of the Arctic Ocean and sea ice. *Marine Policy* (in press); doi: 10.1016/j.marpol.2015.12.027

Avendaño L, Gledhill M, Achterberg EP, Rérolle V & Schlosser C (2016) Influence of ocean acidification on the organic complexation of iron and copper in Northwest European shelf seas; a combined observational and model study. *Frontiers in Marine Science*, 3, e58; doi: 10.3389/fmars.2016.00058

Broszeit S, Hattam C & Beaumont N (2016) Bioremediation of waste under ocean acidification: reviewing the role of *Mytilus edulis*. *Mar. Poll. Bull.*, 103, 5-14; doi 10.1016/j.marpolbul.2015.12.040

Capstick SB, Pidgeon NF, Corner AJ, Spence EM & Pearson PN (2016) Public understanding in Great Britain of ocean acidification. *Nature Climate Change*, 6, 763-767; doi: 10.1038/nclimate3005

Collard M, Rastrick SP, Calosi P, Demolder Y, Dille J, Findlay HS, Hall-Spencer JM, Milazzo M, Moulin L, Widdicombe S & Dehairs F (2016) The impact of ocean acidification and warming on the skeletal mechanical properties of the sea urchin *Paracentrotus lividus* from laboratory and field observations. *ICES Journal of Marine Science*, 73, 727-738; doi: 10.1093/icesjms/fsv018.

Cross EL, Peck LS, Lamare MD & Harper EM (2016) No ocean acidification effects on shell growth and repair in the New Zealand brachiopod *Calloria inconspicua* (Sowerby, 1846). *ICES Journal of Marine Science*, 73, 920-926; doi: 10.1093/icesjms/fsv031.

Daniels CJ, Poulton AJ, Young JR, Esposito M, Humphreys MP, Ribas-Ribas M, Tynan E & Tyrrell T (2016). Species-specific calcite production reveals *Coccolithus pelagicus* as the key calcifier in the Arctic Ocean. *Marine Ecology Progress Series* (in press).

Flynn KJ, Clark DR & Wheeler G (2016) The role of coccolithophore calcification in bioengineering their environment. *Proceedings of the Royal Society B*, 283, e20161099; doi: 10.1098/rspb.2016.1099

Graham H, Rastrick SPS, Findlay HS, Bentley MG, Widdicombe S, Clare AS & Caldwell GS (2016) Sperm motility and fertilisation success in an acidified and hypoxic environment. *ICES Journal of Marine Science*, 73, 783-790; doi: 10.1093/icesjms/fsv171

Gibbs SJ, Bown PR, Ridgwell A, Young JR, Poulton AJ & O'Dea SA (2016). Ocean warming, not acidification, controlled coccolithophore response during past greenhouse climate change. *Geology*, 44, 59-62; doi: 10.1130/G37273.1

Hartmann M, Hill PG, Tynan E, Achterberg EP, Leakey RJ & Zubkov MV (2016) Resilience of SAR11 bacteria to rapid acidification in the high-latitude open ocean. *FEMS Microbiology Ecology*, 92, fiv161; doi: 10.1093/femsec/fiv161

- Harvey BP, McKeown NJ, Rastrick SP, Bertolini C, Foggo A, Graham H, Hall-Spencer JM, Milazzo M, Shaw PW, Small DP & Moore PJ (2016). Individual and population-level responses to ocean acidification. *Scientific Reports*, 6 e20194; doi: 10.1038/srep20194
- Henry L-A, Stehmann MF, De Clippele L, Findlay HS, Golding N & Roberts JM (2016) Seamount egg-laying grounds of the deep-water skate *Bathyraja richardsoni*. *Journal of Fish Biology*, 89, 1473-1481; doi: 10.1111/jfb.13041
- Hermoso M, Chan IZX, McClelland HLO, Heureaux AMC & Rickaby RE (2015) Vanishing coccolith vital effects with alleviated CO₂ limitation. *Biogeosciences* 13, 301-312; doi: 10.5194/bg-13-301-2016
- Hermoso M, Minoletti F, Aloisi G, Bonifacie M, McClelland HL, Labourdette N, Renforth P, Chaduteau C & Rickaby RE (2016) An explanation for the ¹⁸O excess in Noelaerhabdaceae coccolith calcite. *Geochimica et Cosmochimica Acta*, 189, 132-42; doi: 10.1016/j.gca.2016.06.016.
